FIG. 12

A cross-sectional view of a catheter assembly. A central lumen (35) is surrounded by a wall. The wall has two side openings (34) on opposite sides. The catheter is connected to a tube (31) on the left and a tube (32) on the right. A reference numeral 33 points to the central lumen area.

The diagram illustrates a second embodiment of a mechanical assembly. It shows two main curved paths, B and C. Path B consists of segments 25 and 42. Path C consists of segments 30, 70, and 71. There are also straight segments 41, 31,32, 40, and 22. The components are interconnected to form a mechanism.
